Childhood Obesity Conference
San Diego, CA**

The Health of Multnomah County: A Snapshot

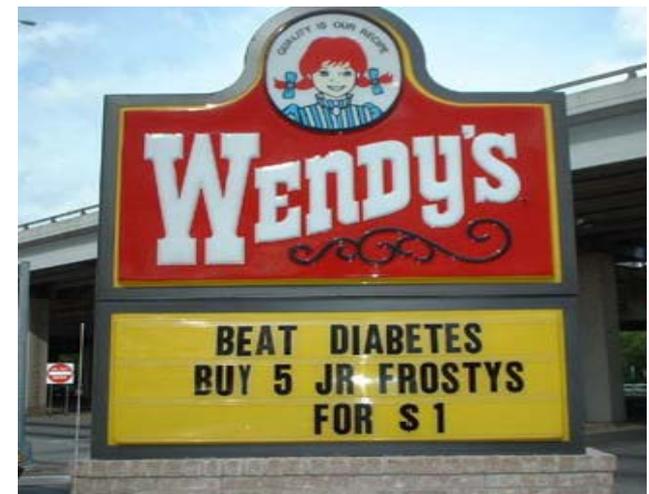

- More than one half of adults are either overweight or obese (BRFSS, 2005)
- 80% of adults with diabetes in Multnomah County were overweight or obese (BRFSS, 2005)
- Only 1/3 of adults report eating the recommended five servings of fruits and vegetables per day (BRFSS, 2005)
- About 10% of Multnomah County 8th graders were overweight, and an additional 15% were at risk of becoming overweight (Oregon Healthy Teen Survey, 2008)
- 84% of 8th graders reported that they had consumed a soft drink at least once during the last week (Oregon Healthy Teen Survey, 2008)

Maximizing Public Health Impact of Policy, Systems & Environmental Change

“It is unreasonable to expect that people will change their behavior easily when so many forces in the social, cultural, and physical environment conspire against such change”.

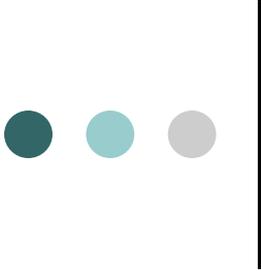

- Institute of Medicine

COMMUNITIES PUTTING PREVENTION TO WORK

Multnomah County's Community Action Plan

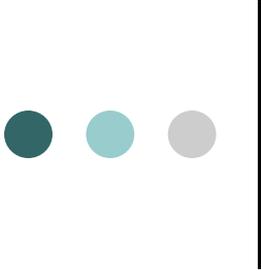

Objectives organized by:

- School Environments
- Urban Environments
- Community Settings
- Community-Wide Media campaigns

Defining Features:

- Focus on policy, environment & systems change
- Promotion of health equity
- Extensive network of community partnerships

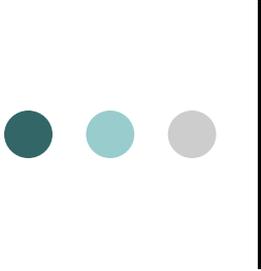

Community Action Plan Highlights: School Environments

Healthy active school environments through increased opportunities for physical activity, farm to school partnerships, cafeteria reforms, and increased water consumption.

- Seven School Districts have adopted wellness policies
- Multnomah County's after school programs (SUN Community Schools) adopted wellness policies for their extended school day programming. New policies establish nutritional standards, increase physical activity and limit non-educational screen time. The County will implement these policies to all 60 SUN Community Schools in Fall of 2011
- Portland Public School District plans to install water stations in 38 schools to increase access to free and healthy water for all students

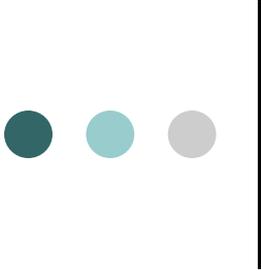

Community Action Plan Highlights: Community Settings

Population and setting specific food policy initiatives, focusing on retail settings, parks & community centers, worksites, faith-based centers, hospitals, and senior centers.

- The Healthy Retail Initiative encourages and promotes voluntary actions by convenience store owners to increase access to healthy, affordable, and culturally relevant food
- The African American Health Coalition and Health Department staff assessed more than 20 corner stores to identify healthy food options and barriers to stocking healthy food options
- The Healthy Department and City of Portland Parks and Recreation are sponsoring the Healthy Options Vending Challenge.

Community Action Plan Highlights: Urban Environment

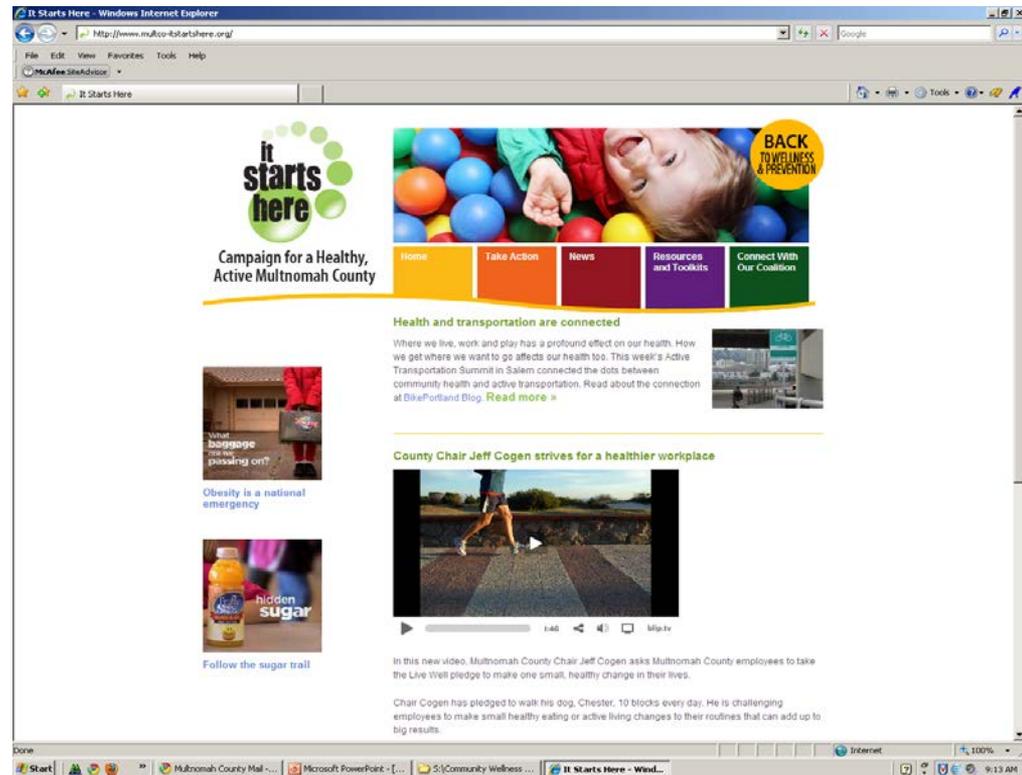

Healthy communities by design through urban planning and transportation policy

- Modification of City Zoning Codes to Encourage Urban Farming & Access to Community Gardens
- Health and Equity has been integrated into the Portland Plan, the City of Portland's twenty year vision planning Process.
- Health Department staff and CPPW partners are working on developing a health and equity assessment tool.

Community Action Plan Highlights: Community- Wide Media Campaign

- A Healthy Active Multnomah County: It Starts Here media campaign aimed at raising awareness about shared barriers to healthy living and building support for community-wide solutions

YOUR KID JUST ATE **16 PACKS OF SUGAR.**

All those extra calories can bring on obesity, type 2 diabetes and heart disease.

Recommendations

Health Equity as a Driver

- Developing the Community Action Plan: Ensuring that **equity** considerations are integrated into health-related public policies is an overarching priority across all CPPW activities
- Leadership Team
- Building community capacity: Investing resources to collaborate with communities experiencing health inequities
- Hiring new staff

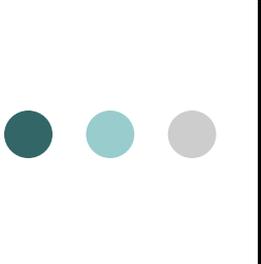

Coordination across multiple partners

- Take an active role in facilitating collaboration between partners to advance policy goals
- Facilitate and identify projects that a variety of partners (i.e., community based organizations, advocacy organizations and governmental agencies) could work on together
- Integrate different techniques (visuals, small group activities, ice breakers) during partner meetings to increase participation and strengthened partner relationships
- Understand the power dynamics and cultural differences between government entities, advocacy organizations and cultural specific organizations

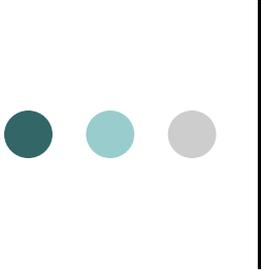

Capacity building and technical assistance

- Provide trainings and education to ensure all partners have a basic understanding of critical topics such as: policy development, social determinants of health, engaging communities, land use and transportation issues and health equity
- Offer policy training for interested partners and their colleagues within their “home” organizations and agencies to help build their organizational capacity
- Partners have different levels of experience doing policy work and Technical Assistance (TA) must be customized

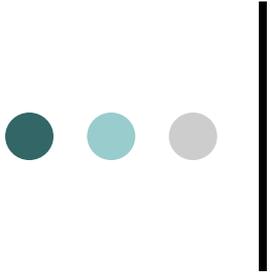

Sustainability

- Funding is key to guarantee active living/healthy eating capacity within agencies/organizations
- Extend coalition efforts: reach out to non-traditional public health partners

“It’s the relationships we’re building that will have an long term impact. The relationships are more important than capacity”
